Mr. Andrew K. T. Goh, B.Econ.

Seminar Duration
2 Days, 9:00am to 5:00pm
Seminar Background
This is an intensive program covering Credit Audit. In particular, participants will be familiarized with the parties that are responsible for managing risk within the bank and the role of the Credit Audit in the Credit Risk Management process. The seminar also outlines the planning and preparation of the audit, conduct and procedures for the on site reviews and assessment of the credit risk management process and portfolio quality with the appropriate ratings. How to handle a closing meeting and salient items that need to be addressed in the final report will also be discussed.

Credit audit is a very specialized form of audit. Officers need to be specifically trained so as to ensure they have the required skills to lead and carry out a proper audit such that the credit risks, weaknesses in the credit process and portfolio quality are properly identified and highlighted. In particular, the need to provide management with a fair and balance assessment of the Credit Risk Management Process and Portfolio Quality must be emphasized so that corrective action could be carried out in a timely manner, and in turn protect the bank against unforeseen Credit Risks.
